

# ENVIRONMENTAL POLICY

## Policy Statement

Boots Civil is committed to planning, carrying out and monitoring our operation to minimise the effect we have on the environment.

## Aims and Objectives

- Implement systems to protect the environment and reduce the risk of construction activities causing pollution, while insuring employees understand the purpose of all procedures and processes.
- Mitigate construction impacts on projects by detailing plans for inspection, monitoring, auditing and correcting or improving
- Comply with all compliance obligations simplistic and practical way
- Continually improve the environmental management system by conducting regular audits and reviewing impacts and aspects
- Measure and improve environmental management performance

## Responsibilities

### Company

- Comply with legal obligations and responsibilities in relation to environmental management

### Management

- Ensure employees have the necessary training to recognise common environmental impacts on construction sites and potential impacts resulting from work activities
- Develop and implement systems in line with environmental management best practices for relevant workplace activities

### Employees

- Identify situations that require further advice about appropriate work practices to minimise environmental damage.
- Comply with instructions, policies and procedures and speak up if instructions, policies and procedure is not suitable or effective
- Recognising and reporting hazards and incidents which may affect the health and well-being of the environment.
